Client Category: Wollongong Council

Location: Bulli Tops NSW

Physical Plant: Containerised Potable Water Treatment Plant.

Influent Type: Surface water from Lodden River.

Capacity: 4.4 cubic meters per hour of potable water.

Problem: Client was concerned with the quality of drinking water that was being supplied to local businesses and park users, though disinfected it did not comply with the Australian Drinking Water Guidelines.

Treatment: SAS Water in affiliation with Enviropacific Services designed, built, installed and commissioned a Variable Pore-Structure Micro Filter System with variable pore structure followed by disinfection. A coagulant dosing system was included for periods of high turbidity.

Containerised VPMF Potable Water Treatment Plant
